Sixteen square feet (4’ x 4’) of poster board space will be provided for each poster presentation. This space will accommodate twenty (20) 8.5 x 11-inch pages. All posters will be displayed for the duration of the conference. The first viewing will be during the evening reception starting at 6:30 pm on Wed., Sept. 17.

POSTER PREPARATION SUGGESTIONS

1] The title of your poster should appear at the top in large letters. Poster titles using a font size of 60 point will stand out and be easy to read. The minimum font size for poster titles should be 36 point. Below the title put the author(s) name(s) and affiliation(s).

2] Your poster should cover the key points of your work. It need not attempt to include all the details; you can describe them to people who are interested. The ideal poster is designed to attract attention, provide a brief overview of your work, and initiate discussion.

3] The flow of your poster should be from top left to the bottom right. You may wish to use color for highlighting and to make your poster more attractive.

4] Use pictures, diagrams, cartoons, figures, etc., rather than text wherever possible.

5] Try to state your main result in large lettering. This way people can read the poster from a distance. The smallest text on your poster should be at least 18 point, and the important points should be in a larger size.

6] Make your poster as self-explanatory as possible. This will save your efforts for technical discussions.

POSTER PRESENTATIONS

1] You may wish to prepare a short presentation of about 5 or 10 minutes that you can periodically give to those assembled around your poster. You may give this talk several times during your poster session.

2] The posters will probably be co-located with the Company Showcase/Exhibit at Integrated Nanosystems, therefore expect to staff your poster during breaks. While the conference is in session you do not have to staff your poster.

3] Plan on removing your poster before the end of the conference at 5:30 pm on Friday, Sept. 19.

4] Integrated Nanosystems will not have conference proceedings, but we will be supplying all registrants with a CDrom of speaker presentations. To include your poster presentation in that CDrom please submit a PowerPoint version of your presentation to ASME before August 30 via the following method:
