ME/ISyE 8773-8774

Bio-thermal Fluids Research Panel Discussion

Wednesday, September 24, 2008

3:15 p.m. — Refreshments before the seminar

3:30 p.m. — Graduate Seminar

Room 1130 Mechanical Engineering

The focus of the panel discussion will be on “The Future of Biotransport Research”. We will highlight the emerging areas of importance and try to answer the question: “How we (as engineers) can be a part of the future in biomedical research and biotechnology.”

The panel consists of faculty members in the Department of Mechanical Engineering at the University of Minnesota, Minneapolis, MN 55455

Alptekin Aksan, Assistant Professor, McKnight Land-Grant Professor, received his Ph.D. degree in mechanical engineering from Michigan State University, E. Lansing, MI, both his M.S. and B.S. degrees in Mechanical Engineering were granted from Middle East Technical University, Ankara, Turkey.

John C. Bischof, Distinguished McKnight University Professor, received his Ph.D. degree in mechanical engineering, and his M.S. and B.S. degrees in biomedical engineering, all from the University of California, Berkeley.

Allison Hubel, Mayhugh Associate Professor, received her Ph.D. and M.S. degrees in Mechanical Engineering from the Massachusetts Institute of Technology, and her B.S. degree in mechanical engineering from Iowa State University.

Informal Faculty Luncheon: Wednesday, September 24, 2008, 12:00 noon. Meet in 1100 ME and walk to lunch with other faculty. Host: Prof. Sean C. Garrick
